

HH Club League, Season 11 - Positions after 11/14 Events

The calculation depends upon your handicap which is determined by recent performance. Newcomers in the season are assumed to run at their handicap speed for their first two events. It depends next upon a synthetic minutes per km figure (which includes course climb). As your performance departs from handicap, the points results are more arguable. Running at half your handicap speed or slower will generate one point; running at twice your handicap speed will generate 150 points. Running at handicap generates 100 points. Despite the decimal points, differences of less than 5 in a season are probably not significant. The exercise is supposed to be FUN - and can best show whether you are improving or declining over a season. A brilliant result will result in an adjusted handicap for next year!

HH Club League Season 11 (autumn 2013 to summer 2014) points after 11 events. Best 6 scores from the events in the season to score. Non-scoring events are shown struck through.

If you have any queries about the league or wish to be removed from the list please contact Mike Bennett, [club.league\[at\]happyherts.org.uk](mailto:club.league[at]happyherts.org.uk)
